

# EnGenius Cloud

## Solution Brochure

### Visualize Your Networks with AI-driven Cloud

EnGenius Cloud is built on top of the most advanced cloud computing technology. Scalable and AI-ready, the robust and dynamic cloud computing infrastructure helps you work smarter on your network with important analytics and visualization tools.

#### Why EnGenius Cloud

Resolve the pain points of traditional networks

Easily manage  
multiple sites

Precisely debug  
the networks

Remotely manage  
device firmware

Cloud-based Unified  
Management

# The Smart Cloud Helps You Achieve More

Artificial intelligence (AI) enables EnGenius Cloud to predict issues before they occur and provide accurate recommendations to proactively improve performance. EnGenius Cloud's Advisory Board uses AI to continuously analyze networks and report potential problems, often before issues occur.

Next-Generation True Cloud Infrastructure for High Stability and Scalability

## Serverless

The Cloud is built on the server-less infrastructure without server boundaries

## FaaS

Each function is scalable and works seamlessly with dynamic allocation

## Reliability

The service-level agreement guarantees 99.99% availability for your network

## Quick Deployment

# Plug & Play Auto-Provisioning

EnGenius Cloud lets you deploy multiple sites with quick registration and configuration, available on your cloud network.

### 1

Register devices with web or mobile app

Scan a QR code with your device to register it to company inventory on the EnGenius Cloud.

PLANNING SITE

### 2

Assign devices to network groups

Create networks with predefined configuration profiles for Cloud managed devices under the same network group, and then apply this configuration automatically to new devices

DEPLOYMENT SITE

### 3

Unbox devices and connect to your network

Once plugged in, EnGenius Cloud will push the proper configuration to the device and work as intended.

### 4

Multiple site deployment made easy

With EnGenius Cloud, deploying and managing multiple sites in different timezones and with various network policies is easy.

# Easy Administration

Get ready for EnGenius Cloud with the easy-to-use features for rapid deployment, initial configuration, and quick registration for one or multiple sites.

## Manage your network with hierarchy view

EnGenius Cloud defines the hierarchy view level as a multilayered group of networks. You can manage and monitor company networks with hierarchy view based on different locations or business setups.

## Two factor authentication to secure your account

Add an extra layer of security with the two-step verification to protect users' accounts from attack when signing in.

## Multi-tenant design with different roles and privileges

Assign different users with roles and privileges to manage your organization's network sites to best fit your business management policy.

## Scheduled firmware upgrade for multiple sites and networks

It is easy to deploy and manage multiple sites by creating firmware upgrade tasks for different groups of devices based on region, local timezone, and other configurations.

## Smart Networking

# Work Smarter with EnGenius Cloud

EnGenius Cloud makes it simple to manage and monitor multiple sites with hierarchy view, gather real-time device information, and utilize many other benefits to fit your business.

### AP

#### Quick access to Access Point status

EnGenius Cloud manages all Access Points in a single place. The Access Points list summarizes the most critical current traffic usage data for the network administrator to access quickly.

### AP

#### Master the detailed status of Access Points

Get in-depth information of the SSID, radio, and IP addressing settings for specific Access Point to optimize the network performance according to its policy and have a clear picture of real-time usage, related logs, and connected clients.

### AP

#### User authentication for Wi-Fi access per SSID

EnGenius Cloud offers various authentication methods for different business requirements. You can configure the AAA authentication all on the Cloud or by Customer's RADIUS server, create a guest Wi-Fi with voucher service, or let users log in by linking to their social media account.

##### Cloud Authentication

Authentication and authorization on EnGenius Cloud

##### Custom Radius

Use local radius server for authentication

##### Voucher Service

Pre-defined access templates and specific portal for front-desk

##### Social Login

Login with a Google account

## AP

### Customize a splash page for your captive portal

Use the WYSIWYG editor to create a pleasing entrance for your captive portal. You can select one of the available templates and place a logo in your preferred position. The customized captive portal properly guides visitor traffic while delivering important messages to your guests.

## AP

### Block suspicious clients from your networks

Rogue client monitoring tools allow you to deny access to your SSID for selected clients.

## AP

### Give devices VIP permission to join networks and bypass captive portal

You can skip authentication for specific clients such as barcode scanners or printers with no web-based interface to proceed.

## AP

### Application priority setting with one-click

By simply selecting the 'AVXpress' mode, users can effortlessly prioritize services such as video conferencing, streaming, and gaming, with the same ease as prioritizing voice calls.

## AP

### Consistent quality through Wi-Fi and wired networks

The AVXpress feature ensures that application traffic from wireless clients receives "Express" priority throughout the entire network, providing seamless prioritization from Access Points to Switches.

## Switch

### Quick view of network Switches

Conveniently monitor and troubleshoot all of your network switches in one location with the switch list by checking overall configurations and real-time meters.

Name	Serial Number	MAC	Model Name	WAN IP	LAN IP	Ports(Active/Total)
7F_01_ECS1528FP	3029G*****	88:***:***:***:***	ECS1528FP	211.23.68.199	10.0.93.245	10.0.93.245
7F_02_ECS1552FP	7936G*****	88:***:***:***:***	ECS1552FP	211.23.68.199	10.0.93.245	10.0.93.245

## Switch

### Detailed view of Switch port and PoE status

Check real-time information of port connection state and PoE utilization and make configurations for each port of individual switches.

8F_05_ECS1152FP	88:DC:96:68:69:4A	ECS1152FP	211.72.124.13	10.0.85.247	10/92	1.1.16
Port view						
1	3	5	7	9	11	13

## Switch

### Comprehensive and flexible Switch configuration

Get full control and flexibility in configuring network switches. Setup network ports, VLAN tags, and other details for one or a group of devices to optimize overall network performance.

## Switch Extender

### Built-in Switch features for network efficiency

The built-in switch features optimize network performance by assigning VoIP traffic to specific VLANs for enhanced call quality and supporting IGMP Snooping to suppress IPTV traffic for optimized bandwidth usage.

## Switch Extender

### Extend PoE connectivity beyond limits

EnGenius Switch Extenders break the 100-meter PoE barrier, offering seamless, cloud-manageable connectivity for devices in hard-to-reach or maintenance-sensitive areas. Durable and reliable, they simplify network wiring and management.

## Switch Extender

### Easy powering multiple devices

EnGenius Switch Extender powers devices efficiently in power-constrained spaces with PSE-out capability, reducing individual power wires while delivering optimized wattage for peak performance.

## VPN Firewall

### Easy setup and secure SD-WAN connections

Streamline your remote work and communication with site-to-site and client VPN. Forget the complexity of traditional VPN configurations and embrace effortless, secure, and private connections for your business.

## VPN Firewall

### Optimal performance with four 2.5G ports

The VPN firewall has multiple 2.5G ports for dual WAN and dual LAN connection for high-speed WAN environment and in-line architecture design.

## VPN Firewall

### Self-Healing Network for Reliable Operations

The cloud-managed devices auto-revert to a stable configuration, ensuring connectivity and minimizing downtime and support costs.

## VPN Firewall

### Stay connected with WAN failover and cellular failover

The dual WAN ports are ready for load balance to increase the WAN bandwidth or redundancy links. If all WAN ports go down, the 3G/4G network connection with the USB wireless dongle can provide a backup for the corporate network from disruption.

## VPN Firewall

### Self-healing Auto-VPN for easy networking

EnGenius VPN Firewalls will automatically update related VPN information to all peers for continuous VPN connection in the case of WAN IP address reassignment or forwarding port change.

## VPN Firewall

### Seamless and secure VPN client for remote working

SecuPoint SSL VPN Client helps businesses with remote workforces to easily establish secure connections to the VPN servers through automated setup and agile certificate authentication.

## PDU

### Quick Access to PDU status

EnGenius Cloud unifies all PDUs in a single platform. The PDU list displays essential power usage data and outlet status for network administrators to access efficiently.

## PDU

### Individual outlet scheduling

The PDU enables individual outlet scheduling, improving energy management. Users can customize outlet operations, optimizing power use and efficiency.

## PDU

### AI-driven Hyperview dashboard

EnGenius Hyperview dashboard with AI-driven analytics and visualization offers a user-friendly interface for monitoring real-time power metrics while displaying electricity costs to enhance budget management.

## PDU

### Detailed PDU status & power data statistics

Obtain comprehensive real-time data and power usage statistics for each PDU outlet's current, voltage, and kWh usage, empowering you to optimize power consumption effectively.

## PDU

### Self-healing Auto-reboot

The PDU consistently monitors internet connectivity by pinging a reliable hostname of specific outlet. If disconnected, it reboots the gateway outlet, helping in internet restoration.

## Camera

### EnGenius AI Cloud Surveillance Solution

EnGenius AI Cloud Surveillance Solution revolutionizes security monitoring by integrating edge AI processing with contextual cloud analytics. Our solution replaces traditional NVR infrastructure with AI cloud cameras featuring built-in storage with local AI processing and real-time detection. To support diverse surveillance needs, our AI-powered Network Video System (NVS) extends sophisticated AI capabilities to any ONVIF-compatible cameras while providing enterprise-grade RAID storage. The EnGenius Cloud platform unifies management of all cameras - both EnGenius and NVS-connected ONVIF cameras - providing intelligent context recognition through a single, scalable platform.

## Edge AI

### The Camera That Thinks

EnGenius Edge AI cameras, with built-in NPU processors, convert bulky video into streamlined metadata, performing instant object detection and recognition right at the source—no bandwidth strain, just smart security.

#### AI Cloud Analytics

Multimodal LLM-powered analysis recognizes complex scenarios and behaviors and enables intuitive search across all cameras.

#### No NVR Required

Our AI cameras feature built-in storage, providing instant footage access and eliminating the need for costly NVR infrastructure.

#### Edge AI Computing

Built-in NPU enables real-time detection, converting video into lightweight metadata that streams efficiently to the cloud.

#### AI Upgrade for Any Camera

Add contextual AI capabilities to non-EnGenius (ONVIF) cameras while connecting the system to the EnGenius Cloud for unified management and protect video data with reliable RAID storage.

## Camera

# Intelligent Surveillance: From Detection to Understanding

Cloud AI

## AI-Powered Context Recognition

Our AI-powered surveillance solution leverages advanced Multimodal LLM technology to understand complex security scenarios in real-time. Moving beyond traditional detection, the system comprehends human interactions and behavioral patterns, automatically identifying critical events such as physical conflicts, unauthorized activities, traffic incidents, and crowd management concerns. This intelligent contextual recognition enables proactive response to potential security threats before they escalate.

Two masked persons aim a gun at the man behind the counter

Man behind the counter raising both hands

A boy in a blue sweater grabs the other's shirt

A boy with a red backpack is pushed against a wall

## Business Intelligence Analytics

### People and Vehicle Counting

Track precise visitor flows and vehicle patterns through ROI-based detection/ cross-line counting, enabling applications such as:

- Peak hour analysis
- Parking optimization
- Entry/ Exit Patterns

## Intuitive Natural Language Search

Transform video search with AI-powered natural language processing. Simply type queries like "person wearing red jacket near entrance" or "group gathering in parking lot," and the system instantly locates relevant footage across your entire network. This natural language search capability is available across multiple languages.

## Intelligent Alert & Notification

Our comprehensive security solution delivers two levels of AI-powered alerts, combining immediate threat detection with sophisticated contextual analysis.

### Edge-AI Camera Alerts

Rule-based detection monitors intrusions, line crossing, crowd density with counting, object detection, and camera tampering.

Region Counting

Crossing Line Counting

Camera Tampering

### Cloud-AI Alerts

Instantly alerts you to critical scenarios like fights, bullying, accidents, and weapon detection through AI-powered behavioral analysis.

Robbery

Fights

Bullying

Kidnapping

Arson

Car Accident

Traffic Jam

Crowd Panic

Gun/ Knife

## Camera

# Contextual SD Alert: Customer-Defined Context Alert

While predefined AI alerts handle common scenarios like fights and arson, every organization faces unique operational challenges requiring customized detection beyond standard alerts.

EnGenius goes beyond conventional predefined alerts by introducing Contextual SD-Alert—empowering you to create intelligent, industry-specific detection tailored to your exact operational needs.

## Your Security, Your Rules

### ✓ Customize Your Own Alerts Using Natural Language

#### SD-Alert

Person making physical contact with child Enter

- No Code / No Retraining
- No Hardware Dependencies
- No Software Installation
- Multi-language supports

### ✓ Smarter alerts built on Contextual Intelligence

Leverages cloud-based LLM agents to trigger alerts based on complete behavioral patterns and sequences, preventing alerts from irrelevant movements or partial activities

### ✓ Teach Your AI What Matters: User-Defined Contextual Intelligence

Train your AI with site-specific knowledge to make smarter decisions. Define what's normal for your environment:

### ✓ Address Specific & Unique Needs across Diverse Industries

### User Entry Scene Description

#### Staff Uniform Features

- The person wearing a blue vest with the supermarket logo is a clerk.

#### Normal Behaviors

- Umbrellas and water bottles should not be classified as weapons.

#### Special Notes

- If over 4 people queue, note number of people.

## How SD-Alert Works

### Define Alert Condition

#### SD-Alert

Someone performs ..... Enter

Setting alert condition by Natural Language, like:

*"Someone performs dangerous stunts on a bicycle in the park"*

### Analyze with Cloud AI

Cloud AI analyzes & recognizes:

- *High-speed riding*
- *Standing actions*
- *No-hands cycling*
- *Jumping curbs*

### Detect Across Cameras

Cam 1

Cam 2

It can detect events **across different cameras** and send pro-active alerts.

## Multi-Face Recognition & Cross-Camera Tracking

### Multi-Person Simultaneous Face Recognition

Unlike systems that can only scan one person at a time, the ECC500 can recognize multiple faces at once—even in busy lobbies or crowded retail spaces.

### Visual Timeline Tracking

With EnGenius AI Cameras, you can follow someone's path across your entire coverage area in one simple timeline. See exactly when and where they showed up, check what they were doing at each spot, and pull up video clips or snapshots instantly. Need a report? Export a complete tracking summary in seconds—turning what used to take hours of video review into just minutes.

### Real-Time Face Recognition with Instant Alerts

Get immediate notifications when persons of interest or tagged individuals are detected through edge AI processing, ensuring instant response times.

### Seamless Face Search via Photo or Footage

#### Upload Photo Search

Just upload a photo, and the system will instantly find that person across every camera. It's a quick, powerful way to track down missing individuals or identify suspects.

#### Select Face from Footage

See someone in the footage? Just click their face to instantly pull up every time they've appeared across your cameras—making investigations faster and easier.

## AI Versatility at the Edge: From EnGenius AI Camera to Any Camera

Deploy intelligence your way - through EnGenius AI cameras with built-in processing or NVS-enabled AI for existing non-EnGenius cameras. Our flexible architecture adapts to your surveillance needs while ensuring consistent AI capabilities across your entire camera network.

EnGenius AI Cameras Transform surveillance with intelligent cameras featuring:

### Intelligent Design

- Built-in NPU for edge AI processing
- Up to 512GB built-in storage for local recording

### Professional Imaging

- Up to 8MP (4K) resolution
- Advanced Sony STARVIS sensor for superior low-light performance
- Up to 30m IR illumination range

### Easy Deployment & Durability

- PoE-powered for simple installation
- IP66/67 weatherproof protection
- IK10 vandal resistance
- NDAA/TAA compliant

AI-powered Network Video System (NVS) Extend AI capabilities to your existing non-EnGenius cameras:

### AI Enhancement for Any Camera

- Transforms ONVIF cameras with advanced AI capabilities
- NPU-powered processing for real-time detection
- Accurate and proactive alerts

### Enterprise-Grade Storage

- High-availability RAID protection
- Extended recording capacity for 30+ days
- Continuous 24/7 operation reliability

### Unified Management Platform

- Seamless integration with EnGenius Cloud
- Centralized control of multi-brand cameras
- Complete ecosystem integration with EnGenius networking devices

# Explore the Visualized Interface and Features of EnGenius Cloud

EnGenius Cloud provides reliable performance, predictive analysis, and real-time insights to allow companies to focus on growing their business. The enterprise-class features help IT quickly build reliable and efficiently managed networks.

Learn more of EnGenius Cloud: [www.engenius.ai/cloud](http://www.engenius.ai/cloud)

## Visualize Your Networks with AI-driven Cloud

[engenius.ai/cloud](http://engenius.ai/cloud)

# Visualized Insights

## Insights from the Big Picture Down to the Smallest Detail

EnGenius Cloud always keeps you updated on your networks status. It performs troubleshooting accurately and effectively, backed by the latest in AI-driven computing insights.

### Network health at a glance

EnGenius AI is a web-based management platform on EnGenius Cloud that lets you manage your networks from an intuitive central interface. This feature-rich, easy-to-use management tool helps you work more efficiently. Its holistic assessments of real-time network health assist you in pinpointing potential issues and organizing a rapid response.

### Quickly Identify Potential Issues with Smart Network Insights

Monitor throughput and channel utilization in real-time. Instantly spot issues and take action to optimize performance without delay.

Wi-Fi planner calculates optimal AP placement and signal strength on your floor plan

Upload a floor plan and preview your Wi-Fi coverage in simulated conditions with heatmaps that factor in real-world obstacles such as walls.

\* Real environmental effects is available in professional plan.

## View the real connections of devices with topology view

The topology view displays all the devices managed by EnGenius Cloud and the relationships between network devices. You can see the real-time status of Access Points and switches and check the detailed information of PoE status, IP and MAC address, and throughput.

- Third-party devices are visible in professional mode.

## Supervise devices with real-time metrics

EnGenius Cloud provides the capability to display device performance in real-time. It breaks down key performance diagnostics such as CPU, memory, and throughput to determine the root cause of any current network problem.

## Get information about layer 7 applications

Take full control of the applications in service with layer 7 dashboards for ranking and usage information.

## Monitor your networks on the go

With the EnGenius Cloud To-Go mobile app, you can always have full control of cloud-managed Switches, Access Points, and devices no matter where you go.

# Diagnositc & Advisory

## Comprehensive and Real-time Support Tools

EnGenius Cloud ensures reliable network performance with AI chat support, remote assistance, and advanced diagnostics, empowering efficient management across industries.

Advanced network diagnostics for optimal performance

EnGenius offers tools like speed tests, ping monitoring, and Pro-level packet capture for efficient troubleshooting and performance analysis, ensuring reliable connectivity.

The screenshot displays two main sections. On the left, the 'Internet Connectivity' section shows a speed test result with a download speed of 312.83 Mbps and an upload speed of 313.71 Mbps. It also includes a ping test to Google (5.077 ms) and Facebook (4.414 ms). On the right, the 'Packet Capture' section allows users to capture network traffic for a duration of 60 seconds, with a 'Filter Expression' field and a 'Filter Example' section providing advanced networking analysis.

### On-line chat bot with AI support

Manage Your networks effortlessly with the EnGenius cloud interface and AI-powered support, providing quick setup, troubleshooting, and advanced features like SmartCast and Hotspot 2.0.

The screenshot shows the 'Wireless' configuration page on the left and a pop-up AI support chat window on the right. The chat window greets the user with 'Hi gary' and asks 'How can we help?'. It includes buttons for 'Ask a question', 'Home', 'Messages', 'News', and 'Help'.

### Secure and temporary support access

EnGenius ensures secure troubleshooting with a passcode system that grants temporary access to your account. This feature allows support teams to diagnose and resolve issues efficiently, with passcodes automatically expiring after a set duration, ensuring your account remains protected at all times.

The screenshot shows a 'Get PASSCODE' dialog box. It asks for permission to 'Give EnGenius Support access to your account' and explains that a passcode is needed for temporary access. It also specifies that the passcode automatically expires after 1 day. A 'Generate PASSCODE' button is at the bottom.

### Tailored solutions for industry-specific needs

EnGenius Cloud delivers tailored solutions to optimize network efficiency across industries like retail, hospitality, and education. Explore best practices to enhance connectivity and streamline operations.

The screenshot shows the 'Industry Vertical Best Practice' section. It features a large hexagonal chart with 'Everything is OK!' text and various network metrics like 'Channel Utilization', 'AP Usage', 'Switch Usage', and '3.46/5G Client Ratio'. To the right, there's a 'CLIENTS' section with a circular chart showing 14 total clients and a list of client types: Windows, Mac, Linux, and Macbook. The right sidebar includes 'Related Articles' for 'Retail', 'Hospitality', 'Education', and 'Service Retailers/Cloud Services'.

# Empower Your Networking with Professional Features

## Scheduling Report

Customize and schedule network reports in minutes

For MSPs to provide regular reports to customers and MIS to continuously track network status, Scheduling Report allows users to generate reports regularly and email to designated persons with customized content, including logo, sender, and selected dashboards.

## Per-user VLAN

User-based VLAN to keep your access privilege within network

Each client can be assigned to a VLAN to access different network resources even under the same SSID and remain the same VLAN across the network, regardless of the SSID with which they are associated. For example, faculty and students accessing the same SSID will be assigned to different VLANs.

## myPSK

Each user has a unique PSK to access the same Wi-Fi Network

When accessing the same SSID, each tenant will have a unique PSK and be associated with different VLAN tags based on the privilege. In the case of dormitory Wi-Fi management, when a user's unique myPSK expires along with his stay, he or she will no longer be able to access the Wi-Fi network.

## Client Timeline

Discover potential connection problems with Client Timeline

Pull up the entire history of a client device to trace back the time and behavior when a network problem may have originated.

Client Name	Last Seen	MAC Address	Client OS	SSID
S402312NB	2 minutes ago	0C:54:15:69:AD:7F	iOS 12	SENA0120
David's iPhone	2020/1/11	255.255.254.0		
E102447NB	14:30:00 PM			SENA0230-1
James-iPad				SSID:Staff
S302319NB				Session time : 1m 20s
AppleWatch				Leave without disassociation
JerryiPhone11 Pro				
Roger_Macbook Pro				
S421775NB				

## VLAN Pooling

Automatic partitioning of a broadcast domain to avoid broadcast flooding

To prevent broadcast traffic from flooding the network, Access Point will randomly assign a VLAN from a pool of user-defined VLANs to each client associated with it, thereby automatically separating the broadcast traffic of clients into multiple VLANs.

## Cloud Authentication

Easy Cloud authentication and voucher services

Use EnGenius Cloud to authenticate client access to the network without the time and cost of deploying an on-premise server. The voucher service is also available to provide users with pre-defined access profiles that help you manage the guest Wi-Fi conveniently.

## Broadcast and Multicast Suppression

Optimize broadcast and multicast traffic for Wi-Fi networks

When a broadcast or multicast packet floods the subnet, a broadcast storm will reduce network performance. Broadcast and multicast suppression can reduce the number of traffic sending from wired networks to wireless networks.

## MSP Portal

Single Dashboard to see everything and miss nothing

Gain a centralized, holistic view for comprehensive oversight and control across multiple tenants (organizations). The MSP Portal efficiently scale and manage customer networks from a single dashboard.

## MSP Portal

Simplified team management across multiple organizations

With simplified team privileges, MSP administrators can assign access rights to entire teams instead of individual users. Effortless team modifications ensure that when changes occur within a team, updating the team list automatically adjusts access rights across all associated organizations or networks, maintaining consistent permissions throughout.

## MSP Portal

Unified inventory & licensing for efficient management

Our platform provides a one-stop management solution for MSP administrators, offering centralized control over device and license registration. This facilitates seamless device relocation and ensures proactive inventory control, including comprehensive tracking of upcoming license expirations for optimal visibility.

## MSP Portal

Clone to deploy for easy setup in minutes

The 'Clone' feature enables the smart copy of configurations from specific Organizations and Networks, significantly reducing setup times and eliminating repetitive configurations. This streamlines the launch of new Organizations and Networks by minimizing redundant settings for similar tenants, unleashing efficiency in deployment processes.

# Counter the Risk of Wireless Threats with EnGenius Security Access Points

\*\*Available for AP models with dedicated radio only. (i.e. ECW-xxxS)

**AirGuard WIPS/WIDS**

**Spectrum Analysis**

**Zero-wait DFS**

**BLE Capability**

AirGuard™ is an intelligent wireless security system built into the EnGenius Cloud security AP to protect the airspace from rogue devices and wireless threats 24/7. Using dedicated scanning radios, AirGuard security APs continuously scan the environment for rogue APs and other threats without degrading network speed at all.

## AirGuard™

### AirGuard™ WIPS/WIDS to secure your WLAN

AirGuard™ is an intelligent wireless security system built in to the EnGenius Cloud security AP to protect the airspace from rogue devices and wireless threats with dedicated scanning radios.

## Zero-Wait DFS

### Zero-Wait DFS to avoid disrupting client connection

The dedicated radio continuously scan all DFS channels in the background and maintain a list of available DFS channels—preventing client devices from being temporarily disconnected.

## RF Spectrum Analysis

### Spectrum analysis while maintaining performance

The security AP can perform real-time spectrum analysis of its environment with dedicated radio scanning without decreasing performance.

## Wi-Fi 7

# Next-Generation Wi-Fi With Blazing-Fast Speed, Greater Capacity, and Ultra-Low Latency.

## The Ultimate Wireless Solution - Wi-Fi 7 Access Points

Wi-Fi 7 is the latest Wi-Fi standard that fully utilizes the resources of the three frequency bands (2.4 GHz, 5 GHz, and 6 GHz), emphasizing the 6 GHz band to provide an extensive bandwidth, offering extremely high speed and low latency.

## Wi-Fi 7 Solution Advantages

## Innovative Features of Wi-Fi 7

### 2x Wider Bandwidth

320 MHz in 6 GHz band

The three 320 MHz channels unlock the full potential of the 6 GHz bands with Wi-Fi 7, eliminating bottlenecks and boosting productivity. Get more transmission done in less time for faster speed.

### 120% Faster Scheme

4K-QAM

The 4096-QAM utilizes a higher modulation scheme to encode data, enhancing throughput and greater capacity by increasing the number of data symbols transmitted per second, enabling more devices a seamless experience.

### Better Efficiency

Multi-RU & Puncturing

Wi-Fi 7 access point allows multiple devices to transmit and receive data simultaneously. Multi-RU enhances capacity from multiple client devices, while Preamble Puncturing reduces overhead and improves efficiency by using shorter preambles.

### Minimal Latency

Multi-Links Operation

With MLO, Wi-Fi 7 access point empowers devices to seamlessly transmit and receive data across multiple bands and channels simultaneously to increase throughput, reduce latency, and improve reliability.

# Scenarios Where Wi-Fi 7 Can Boost Business Performance

## Business

### WORKPLACES

#### Fast speed, Low latency

Elevate collaboration and boost productivity in your workspace with Wi-Fi 7. Enjoy blazing-fast speeds and minimal latency, enabling smooth video conferencing, seamless file sharing, and effortless usage of cloud-based applications. Stay connected and maximize your productivity in the most demanding work environments.

## Business

### INDUSTRIAL IOT

#### High capacity, Low latency

Realize the revolution of industrial IoT with Wi-Fi 7, delivering unparalleled bandwidth, increased capacity, and ultra-low latency. Seamlessly connect multiple IoT devices, enabling smooth communication, real-time interactions, and automation for manufacturing, logistics, and energy management.

## Smart Life

### PUBLIC SPACES

#### High Capacity, Low Latency

Experience enhanced capacity in high client-density public spaces such as convention centers, transit hubs, and shopping malls with Wi-Fi 7 to meet the ever-growing demand for wireless connectivity. Empower users with reliable, ultra-fast Wi-Fi for seamless browsing, streaming, and real-time information.

## Smart Life

### ENTERTAINMENT

#### High Speed, Low latency

Unleash the full potential of entertainment with Wi-Fi 7. Superior speeds and minimal latency allow Wi-Fi 7 to deliver seamless enjoyment for high-definition 8K streaming, online multiplayer gaming, and immersive virtual reality (VR) experiences.

# Deploy and Monitor Your Networks On the Go

## EnGenius Cloud To-Go

Smart Networking at Your Fingertips

With the EnGenius Cloud To-Go mobile app, you can always have full control of cloud-managed switches, access points, and other devices. Get real-time alerts no matter where you are. Easy device deployment, visualized monitoring, and alerts for abnormal network activity available within an intuitive mobile app.

### Easy deployment and configuration

Scan, register, and quickly configure Cloud network devices

### Simple monitoring and management

Smartly manage Access Points, Switches and clients and stay informed to troubleshoot

### Highly secured and flexible

Rich features your business needs in one place

# Keep Your Network Growing with Your Business

Manage all branch networks  
remotely

Leverage expertise for local site  
network management

Expand networks in no time

## How EnGenius Cloud To-Go Cares for Your Business

### Retail Store

#### Flexible network deployment

Cloud To-Go managed devices can be mounted to ceilings, walls, or poles. They can easily fit into any environment.

#### Always-on networks for business

Cloud networks let you smoothly run all in-store services that need to be online, such as streaming music and realtime surveillance.

#### Multi-site management

You can easily assign new members to manage and remotely control the networks for all branch businesses.

### Hospitality

#### Setup-and-go in minutes

Follow the easy step-by-step guidelines of the app to quickly set-up your cloud-managed devices.

#### Ideal Wi-Fi access for all guests

Set up traffic shaping and bandwidth for your guests to ensure everyone has fast and steady Wi-Fi.

#### In-store messages for branding

Customize the captive portal with your brand to welcome your guests to access the Wi-Fi and share their positive experiences in your store.

### Small & Home Office

#### Improve the working efficiency

A fast connection for employees to focus and accelerate their work without any latency despite the type of office.

#### Monitor networks remotely

No matter when or where you are, you can check the real-time status and manage settings for your networks with your mobile device.

#### Secure connection and data

The Cloud-managed networks are well-protected for the connection and data of your company, staff, customers, and visitors.

## Start with essential features and upgrade with Pro licenses.

EnGenius Cloud provides two types of feature plans, Basic and PRO. Set up the feature plan to either Basic or PRO for product categories so that you can use the Basic/Pro feature set in the AP, Switch, VPN Firewall, PDU and Extender.

<b>Basic Basic Plan</b> <small>For SOHO, SMB, and fast-growing retail and hospitality to manage networks in a simple way</small>			
<b>PRO Professional Plan</b> <small>For SMEs, managed service providers and networks required more advanced features</small>

\*Available for AP models with dedicated radio only. (i.e. ECW-xxxS)

## Start with essential features and upgrade with Pro licenses.

EnGenius Cloud provides two types of feature plans, Basic and PRO. Set up the feature plan to either Basic or PRO for product categories so that you can use the Basic/Pro feature set in the AP, Switch, VPN Firewall, PDU and Extender.

<b>Basic</b> Basic Plan <small>For SOHO, SMB, and fast-growing retail and hospitality to manage networks in a simple way</small>			
<b>PRO</b> Professional Plan <small>For SMEs, managed service providers and networks required more advanced features</small>			
Cloud License Price	FREE (no license needed)		
Platform-wide			
Cloud Network Management	<b>Easy Administration</b> <small>Quick deployment with QR-code scan Hierarchy view &amp; multi-tenant design Two factor authentication Schedule firmware upgrade</small>	<b>Smart Networking</b> <small>Quick access to device live view Variety of user authentications Custom splash page Block/ VIPed client</small>	<b>Visualized Insights</b> <small>Network dashboard AI-driven advisory board Device real-time metrics Usage of Layer 7 applications</small>

## ECW Lite Feature Comparison

Access Point	ECW Lite - Basic Plan	ECW Lite - Professional Plan
Statistic Data Storage	1 Day	30 Days
Cloud Radius and Voucher Service	100	100
Change Log	V	V
Alert Notification	On-line/Off-line	On-line/Off-line
Backup & Restore	-	V
Clone Network	-	V
Client List Export	-	V
Topology	V	V
API Integration (3rd party)	-	V
Broadcast Suppression	V	V
Application QoS(AVXpress)	V	V
Live Diag Tools	Limited	Limited
Live Client List	-	V
VIP/Allowlist/Block List	100	100

\*ECW-Lite AP models don't support other Pro features if not listed in the above table.

## Basic Plan Comparison of ECW and ECW Lite

Access Point	ECW Lite - Basic Plan	ECW Lite - Professional Plan
Hotspot 2.0	V	-
RadSec	V	-
VLAN by RADIUS	V	-
Other Basic Plan Features*	V	V

\*Except the three features above, ECW Lite Access Points support all the rest features as ECW ones in the Basic Plan.
